## PREFACE

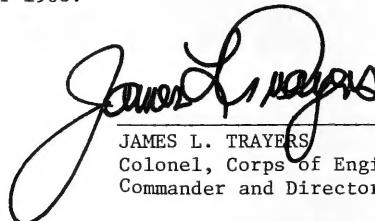

This collection of selected references is published to assist engineers and scientists in ecological research and in the planning and preparation of related engineering reports. The work was carried out under the coastal ecology research program of the U.S. Army Coastal Engineering Research Center (CERC).

These references were compiled as part of a predredging study at Sand Key and Treasure Island, Florida, by Mr. Carl H. Saloman, Fishery Biologist of the Gulf Coastal Fisheries Center, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, under Interservice Agreements No. 71-18, 72-33, and 73-27 with CERC.

Mr. Robert M. Yancey, Chief, Ecology Branch, Research Division was the CERC contract monitor for this report.

Comments on this publication are invited.

Approved for publication in accordance with Public Law 166, 79th Congress, approved 31 July 1945, as supplemented by Public Law 172, 88th Congress, approved 7 November 1963.
